

# Long Branch Green Team & Environmental Commission

## Spotlight Topic: Ross Lake Park & Native Garden

**Location: 19 Elinore Ave**

[www.restorethewatershed.net](http://www.restorethewatershed.net)

Ross Lake Park features native trees, shrub and perennials with signs indicating common and botanical names. You can sit on a bench and gaze across the lake at the 120 year-old restored stone hut. Perhaps you'll see the bald eagle that nests at Monmouth University. Or you might see the osprey or the great blue heron. Peruse our website and find out about the interesting history of this area, including the fact that 7 presidents of the United States spent their summers here.

**Volunteers are welcome:**

The all-volunteer Garden Friends of Ross Lake Park are there every Thursday morning at 9 am from April thru December. Please join our all-volunteer group to help keep this park looking great.
